Abstract

This is the EUROSIM congress final-paper formatting layout. However, the authors are encouraged to use final paper formatting also for typesetting of the extended abstracts that will be used in the reviewing procedure. Using the final paper format, the extended abstract must not exceed 6 pages. Extended abstracts and final papers will be submitted on-line, therefore, only pdf-format documents will be accepted. Uploaded pdf document will appear in the proceedings without further reformatting, therefore, the authors are kindly asked to follow the instructions as strictly as possible. The first page of the final paper will directly appear in the book of abstracts, therefore, title, authors, corresponding author's e-mail address, abstract, keywords, and presenting author's biography must not exceed one page! Full papers will be published on a DVD. For Latex (eurosims.cls) and Word (eurosims.dot) templates are available on the congress server. The minimum length of the final paper is 6 pages, maximum length is not limited. The abstract should be 200 – 250 words long, and no more than five comma-separated keywords should be used. Only corresponding author's e-mail should appear in the first page. Posters are treated as papers with alternative presentation method, therefore, final poster version has to be submitted using the same formatting rules as the final paper.

Keywords: Eurosims, Slosims, Final paper formatting, L^AT_EX style, MS Word style.

Presenting Author's Biography

Sašo Blažič. A short professional biography of the presenting author should be put here, starting with the presenting author's name. The length of the presenting author's biography is limited with the remaining space on the first page. To the right of the biography text a picture of the presenting author should appear.

1 General

The whole paper should be written on A4 paper with 2.5 cm margins on all sides in Times New Roman Font. Pages must not be numbered and no text should appear in the footnote or header.

The first page should start with the title (font size 20pt, uppercase, centred, 1cm below upper margin). Next, the comma separated list of authors' names should appear (font size 12pt, bold, 12pt below title, centred). The authors' names should be followed by the authors' affiliations (font size 12pt, 12pt below authors' names, centred). If authors come from different organisations, the affiliations have to be separated by new-line character and superscripts should be used for linking authors and affiliations. Below the affiliations, corresponding author's e-mail should be put (font size 12pt, italic, 6pt below affiliations, centred). Abstract title should be placed next (font size 12pt, bold, centred, 12pt below the corresponding author's address) The abstract text should appear in a single column below the abstract title (font size 12pt, 12pt below the abstract title, justified). Keywords should be written below the abstract (font size 12pt, bold, 12pt below the abstract, justified). Below the keywords the presenting author's biography should be placed, starting with the title "Presenting Author's Biography" (font size 12pt, bold, 12pt below the keywords, left-justified). The biography text should be written below. (font size 12pt, 6pt below the biography title, justified, right margin 3.5 cm). A 0.5 cm off the right text margin, a picture of the presenting author should appear (3x4cm).

The text in the following pages should be formatted in two columns. The two columns should be 7.75 cm wide with 0.5 cm of space in-between. The text should be written in 10pt font size with single line spacing.

Paragraphs should be separated with an empty line and should not be indented at the beginning.

2 Sections and subsections

2.1 Section titles

Section titles should be consecutively numbered and written in 12pt, bold, font with 12pt of additional space before and after title.

2.2 Subsection titles

Subsection and lower level titles should be written in 10pt, bold font with 6pt of additional space before and after title. Numbered subsections should not go to more than two nested sub-levels.

3 Figures, tables, and equations

All figures should be referred to in text with Fig. N, tables with Tab. N and equations with Eq. N, where N is consecutive number of the referred object.

3.1 Figures

Figures should be of sufficient quality for camera ready papers. They should preferably fit within column, however, if absolutely necessary they can stretch over both columns. The captions should be numbered consecutively with arabic numerals and written in 10pt size, and centred below the graphics, as shown in Fig. 1.

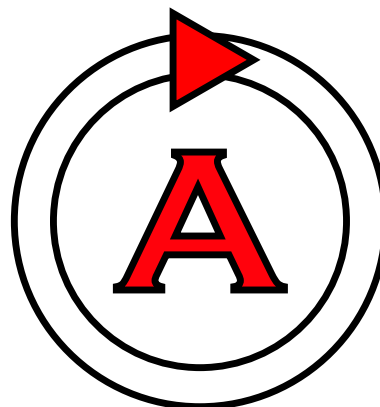

Fig. 1 The laboratory logo

3.2 Tables

For Tables, similar rules apply as for Figures, except that the caption is placed above the table. The sample can be seen in Tab. 1.

Tab. 1 Just another table

N	A	B
12	155	344
13	160	311

3.3 Equations

Equations should be centred and numbered consecutively at the column's right side margin. Numbers should be put in brackets and written in 10pt font size, as shown in Eq. (1).

$$\frac{dx}{dt} = -k_1x + X_0 \quad (1)$$

4 References and citations

All references should be written in order of citation and written as numbered list at the end of the paper with 10 pt font size. All items should be numbered with arabic numerals and placed inside square brackets. The text should be 0.6 cm indented with respect to the left margin and 0.6 cm tab character should be placed between item number and the start of the reference text. Literature items should be cited in text with their numbers within square brackets like [1] or [2, 3, 4, 5]. References should be listed as follows: article in journal is shown in [1], book is shown in [2], conference paper is shown in [3], technical report or manual is shown in [4], and web page is shown in [5]. Titles of books, journals, and conference proceedings should be written in italic.
